

NRRCC Veterans Grant

True heroism is remarkably sober, very undramatic. It is not the urge to surpass all others at whatever cost, but the urge to serve others at whatever cost.

- Arthur Ashe, 1st LT U.S. Army, Presidential Medal of Freedom recipient

We've stood before the American flag, raised our right hand, and sworn an oath to the constitution of the United States. This is a solemn pledge of faith and allegiance. It is a commitment that many cannot make.

In keeping with this selfless service, we have made the commitment to care for our fellow men, women, and children. As we have before, we stand for them now. We will treat every patient population from birth to the unfortunately terminal. When called upon we will ease their distress, we will fight their disease, and we will help them breathe easier. Though the manner is different, we continue to protect life.

The WSRC and MSRC greatly appreciate the contributions and the perspective that our veterans provide, and we'd like to encourage your continued engagement within our associations and our profession. In this respect we have created the **NRRCC Veterans Grant**.

The grant is a one-time award of \$250.00 to be presented at the NRRCC following the presentation of the colors. Recipients will also receive reserved seating for presentations. There will be one grant recipient from each state. Application and participation criteria apply.

If you have not registered to attend the 2019 NRRCC and you would like to apply, then please e-mail your respective Military Liaison Chair:

Wisconsin: Nicholas McCord, BSRT-RRT nmccord@uwhealth.org

Minnesota: Samuel Anthony, RRT, LRT Anthony.Sam@Mayo.edu

We will gladly e-mail you the application and participation criteria. Those who have already registered will receive this e-mail as your registration is forwarded to us. We look forward to seeing your applications.

The WSRC and MSRC would like to thank you for your service to our country. Your dedication, sacrifice, and selflessness are evident in all you do for our patients.
